1 Fejerskov O. Changing paradigms in concepts on dental caries: consequences for oral health care. Caries Res 2004;38(3):182-91. that leads to a progressive dissolution of mineralized dental tissues (enamel, dentin, and cementum) until a carious lesion is clinically visible. Despite a worldwide decline in dental caries largely due to the ... Thu, 15 Mar 2018 17:42:00 GMT Colgate Oral Health Dialogue â€œ 2017- Risk Assessment for ... - Tooth decay, also known as dental caries or cavities, is a breakdown of teeth due to acids made by bacteria. The cavities may be a number of different colors from yellow to black. Symptoms may include pain and difficulty with eating. Complications may include inflammation of the tissue around the tooth, tooth loss, and infection or abscess formation.. The cause of caries is acid from bacteria ...
